Education

Visvesvaraya National Institute of Technology, Nagpur

Aug 2023 – May 2027

Bachelor of Technology: CGPA 8.25/10

- **Coursework:** Computer Programming, Discrete Mathematics, Data Structures, Algorithms, Material Data Science and Programming, Object Oriented Programming, Database Management System, Operating System, Computer Networks

Experience

Accenture: *Software Engineering Intern*

May 2026 – Jul 2026

- Improved media analysis throughput by **20×**, reducing processing time for **100+ images from 15 min to 45 sec (95% reduction)** using Python async concurrency, semaphores, and parallel execution in a production.
- Engineered a **Databricks Volume backend for DeepAgents**, implementing **8 production grade file search primitives** and enabling enterprise scale data access directly from agent workflows.
- Redesigned a QA multi agent architecture by replacing a complex subagent hierarchy with **2 specialized agents**, reducing orchestration complexity while improving modularity and workflow maintainability.

Projects

GitLike: Version Control System : Python, Argparse, Zlib, SHA-1 hashing

[Code](#) [↗](#)

- Developed a command-line VCS implementing repository, staging, committing, branching from scratch.
- Added .gitignore parsing, reference management, and a staging index compatible with Git config formats.
- Engineered a SHA-1 object database with zlib compression and implemented 15+ Git commands (init, commit, log, cat-file, etc.) replicating Git's core workflows and data structures.

RayTracer: Ray Tracing Engine : C++, Object-Oriented Design

[Code](#) [↗](#)

- Created raytracer rendering spheres with recursive reflection, refraction, shadows, and Lambertian shading.
- Implemented ray-sphere intersection, Fresnel effect blending, and bias correction to avoid self-intersection.
- Built Vec3 class for 3D vector and color math supports normalization, dot products, and component operations.

Chatty: Real Time Chat Application : MERN, Socket.io

[Code](#) [↗](#)

- Built a full-stack chat app with WebSockets enabling real-time messaging between concurrent users.
- Deployed on **Render** with 15+ REST APIs and Cloudinary integration for image uploads. [\[Live Website\]](#) [↗](#)

TeleDir: VNIT Phone Directory : Flutter, Dart

[Code](#) [↗](#)

- Created Telephone directory mobile app, integrating 4000+ department and faculty contacts with advanced search and filter features, benefiting 5000+ students and faculty. Improved lookup efficiency by 100%
- Enabled offline access by parsing and transforming large JSON datasets into lightweight local storage.

Technologies

Languages: C, C++, Python, JavaScript, TypeScript, Dart, SQL

Frameworks: LangChain, LangGraph, DeepAgents, MCP, React.js, Next.js, Express.js, Node.js

Databases & Platforms: MongoDB, Databricks, Vector Databases, REST APIs

AI/ML: LLM Agents, Multi-Agent Systems, RAG, Prompt Engineering, AI Workflows

Tools: Git, GitHub, Linux, Postman, VS Code, Android Studio, Docker

Achievements

- 3-Star **1600** Rating on [CodeChef](#) [↗](#), **1900+** **Knight** on [Leetcode](#) [↗](#), **950+** questions solved on [Codolio](#) [↗](#).
- Secured JEE Mains Top **5%** nationwide; **Silver Medalist** in National Cyber Olympiad (school level).
- Flipkart GRID 7.0 Semifinalists across India

Positions of Responsibility

President, SyntaX Coding Club, VNIT

June 2026 – Present

Student Mentor, Student Mentor Programme (SMP), VNIT

Apr 2025 – Present

General Secretary, V.G.Bhide Boys Hostel, Hostel Section, VNIT

Aug 2024 – Aug 2025

Technical Secretary, J.C.Bose Boys Hostel, Hostel Section, VNIT

Aug 2023 – Aug 2024
